Ancient Wisdom. Modern Wellness.

THE STORY

Himalayas are the native place to almost all herbs, trees, minerals, etc. that were described by the fore fathers of ayurveda traditions. Ayurveda is a simple science that treats most complex diseases. The concept of imbalanced nature of VATA, PITA, KAPHA (V-P-K) in every individual is the underlying principle for treatment in Ayurveda. It takes care of body, mind and soul, therefore, provides a unique remedy to all diseases at root level. Veda5, nestled in The Himalayas, is the perfect ground to prepare numerous formulations from various selected material and ayurvedic literatures.

The herbs, fruits, seeds, roots, etc. are collected from their natural habitats in the Himalayas. Special care is taken about the time and procedure of collection. These are safely brought and tested in our lab. And are skillfully processed by traditional ayurvedic methods to ensure their 100% efficacy.

The result is that our products are natural, non-toxic, unadulterated without synthetic & inorganic chemicals and above all generally with no side effects. All our products are manufactured inhouse at our GMP certified manufacturing unit near Jolly Grant Airport, Dehradun (Uttarakhand).

IMMUNITY BOOSTERS
